

INSTALLATION INSTRUCTIONS

Part Number KA-5096

This filter fits: 1996-01 Kawasaki EN500

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter can last 1 million miles or more. This filter is a direct replacement for the stock air filter, and no modifications will be required. However the following procedure MUST be followed to ensure a proper fit and seal of the K&N Filtercharger®.

INSTALLATION

- 1) Remove the stock air filter according to the owner's manual.
- 2) Slide original air filter out and carefully clean the inside of the airbox.
- 3) Apply a liberal amount of the supplied grease to the area between the two bump seals. (see fig. 1)
- 4) Apply the remaining grease to the lip seals on the three other sides evenly. (see fig. 1)
- 5) Re-install the air filter back into the airbox making sure that the pull tab is facing out and that the air filter is completely pushed into the airbox. (see fig. 2)
- 6) Wipe an area clean on the outer part of the airbox visible to anyone servicing the air filter and place the K&N "Do Not Discard" decal in this area.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.
