Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter can last many seasons. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N® air filter seals properly.

### INSTALLATION:

1. Remove your stock air filter from the air box.
2. Clean all sealing surfaces in the air box.
3. Use the supplied K&N® sealing grease on the top of the seal around the filter.

**NOTE: Remove the top of the sealing grease and cut the tip off to allow a sufficient bead of grease on the seal of the filter. (Fig. 1)**

4. Install K&N® Air Filter with the engraving FRONT/TOP towards the front of the bike, arrows should also be facing up. (Fig. 2)

**THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.**
